In order to effectively use the *Mental Measurements Yearbook* series you will also need a copy of *Tests in Print VIII*, which indexes the *Mental Measurements Yearbooks*. Each edition of *Mental Measurements Yearbook* reviews only a selection of tests—**not all tests**! Some tests are not reviewed at all in *Mental Measurements Yearbook*.

**Where are Tests in Print VIII and the Mental Measurements Yearbooks located?**
Both are located in the Reference area of Grace Library.

*Tests in Print VIII*:  
*Mental Measurements Yearbook*

**Tests in Print VII**
First, locate your test in *Tests in Print VIII* to see in which edition(s) of *Mental Measurements Yearbook* your test is reviewed. Get the edition and test numbers.

There are three indexes in the *Tests in Print* that you will find helpful.

*Index of Titles*
Come here when you already know the name of your test. There are helpful cross-references included, as well as alternative titles and updated information.

The number indicator after each entry is the test number, not the page number, of this volume. Out-of-print tests are also included here. If the test number is preceded by a colon, this identifies that the test is out-of-print.

When reading test numbers you will often find that just one number is given, which indicates the test number in **this** volume. Below is a page from *Tests in Print*. The test called “Math-Level Indicator” is given the test number 1543. If a number and a colon are given, the first number indicates the *Mental Measurements Yearbook* that is being cross referenced and the second number is test number in that edition. In our example, “Mathematics 5-14” is found in the 16th volume of *Mental Measurements Yearbook*. Some entry numbers have a “T” prefix. They are referring you to a previous *Tests in Print* volume, followed by the test number.

Math–Level Indicator, 1543  
Mathematical Olympiads, 1544  
Mathematics 5–14, 16:142  
Mathematics 7, 1548
Once you have identified your test number, you will need to obtain some descriptive information about it by referring to the “Tests in Print” section. Here is an example of a test entry:

The entries that have cross references to reviews indicate which volume of the *Mental Measurements Yearbook* you need and also what test number to reference in that volume. In this example, you need test number 141 of *The Sixteenth Mental Measurements Yearbook*.

**Score Index**
Come here once you have identified the variable or concept that you are interested in measuring. Some variables are defined in a way that you did not have in mind, so think about looking up alternative variables. The test numbers are interpreted the same way that the "Index of Titles" is. Here is an example entry from the Score Index.

**Classified Subject Index**
Come here when you have an area of interest that needs to be narrowed down in order to identify the best test(s). Achievement, Behavior Assessment, Developmental, Education, English and Language, Fine Arts, Foreign Language, Intelligence and General Aptitude, Mathematics, Miscellaneous, Neuropsychological, Personality, Reading, Science, Sensory-Motor, Social Studies, Speech and Hearing, and Vocations.

A descriptive listing of the categories precede the Classified Subject Index.

**Mental Measurements Yearbooks**
Look up your test by number in the appropriate *Mental Measurements Yearbook(s)*. Here you will find reviews of the tests. *Mental Measurements Yearbook* does not provide a copy of the test; the content is only reviews of tests.
