

Interactive Accessible Inclusive Learning

applied professional development clinic

16-19 July 2018

9:00 a.m.-3:00 p.m. daily

Want to create interactive modules for your online course, but think you don't have the resources, time & budget?

Wondering how to create inclusive and interactive digital learning modules and courses?

Join us for a dynamic, practical, hands-on 4-day workshop where you will create a budget and time-friendly interactive online lessons with a focus on accessibility.

Come prepared with a project to work on. Choose an area, topic or lesson that you would like to transform into an interactive experience for the student. We will be using a familiar software application, such as PowerPoint, to create a product that you can use in your class.
